RE: Business Proposal sent today at 15.33hrs

Your Royal Highness,
I understand you will need proof of the physics, please accept the attached as my gift for your personal use. this is just one small example of the blueprinted technology i have to offer

I am designing the cryo-thermo-electric cell as we speak and while I have a design blueprinted it is not yet tested, this will make the CPU operational without liquid cryo cooling...
The computer program is proof the physics I sent works as stated.

The gamma wave CPU in the data can only be built by a matter replicator that builds it atom by atom (designed and blueprinted and is different from transmodulation microwave previously sent), for this you will need to build the soft x-ray CPU as the control which is attached.
it runs on the frequency program also attached.

If anything is missing or not clear please do not hesitate to contact me by replying to this email.

Sincerely,
Peter Thompson.
